

# ORACLE® Warehouse Management

Jennifer Sherman  
Sr Director, Fulfillment Applications Strategy

# The Safe Harbor

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle's products remains at the sole discretion of Oracle.

# Agenda

- **Business Challenges**
- Oracle's Leadership Position
- Solution Overview
- Customer Success

# Business Pressures

## Just-in-Time Delivery

- How can I improve the speed of warehouse operations?
- How do I integrate operations to reduce order processing time?

## Guaranteed Availability

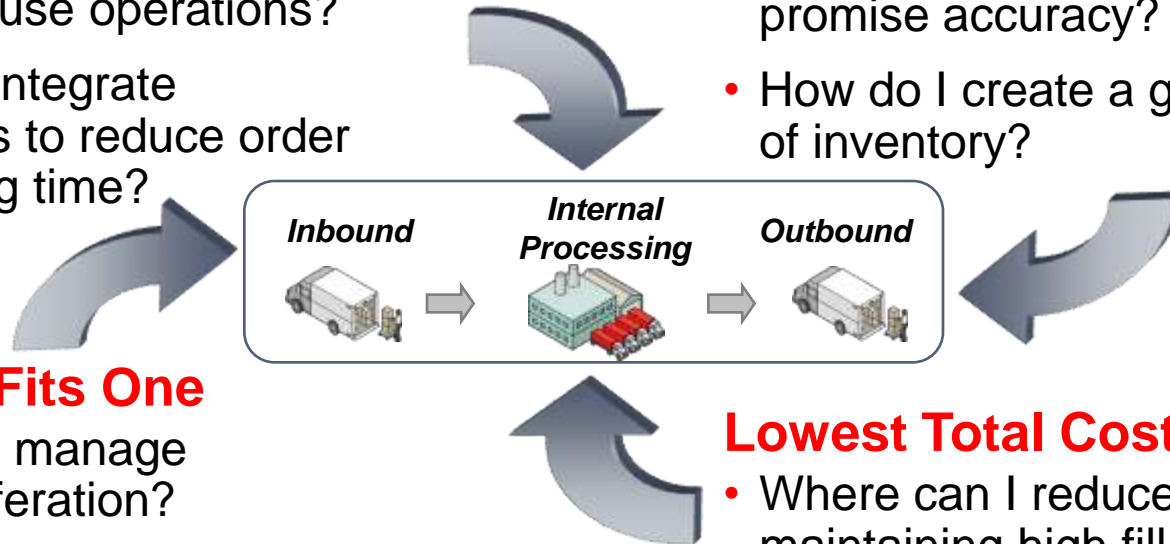

- How can I improve order promise accuracy?
- How do I create a global view of inventory?

## One Size Fits One

- How can I manage SKU proliferation?
- How do I ensure labeling compliance?

## Lowest Total Cost

- Where can I reduce inventory while maintaining high fill rates?
- How do I improve labor efficiency?

# A Need for Change

## *Leading Business Trends*

- Fulfillment Processes Integrated with Partners
- Support All Company Processes (e.g. Service, Mfg)
- Automated Material Handling for Improved Productivity
- Mobile and Automatic Data Capture (e.g. RF, RFID)
- Streamlined Material Flow (e.g. Cross-Docking)
- Aligned Logistics Processes

# Agenda

- Business Challenges
- **Oracle's Leadership Position**
- Solution Overview
- Customer Success

# Improve Warehouse Management Functions

*Increase Efficiency of All Resources*

## Warehouse Efficiency

### Worker Productivity

- Automate Warehouse Processes
- Optimize Task Assignments
- Reduce Worker Travel Time

### Resource Utilization

- Optimize Total Warehouse Space
- Maximize Use of Equipment
- Optimally Locate Inventory to Reduce Travel Time

### Inventory Utilization

- Reduce Inventory Carrying Costs
- Streamline
- Material Flow
- Reduce Inventory Obsolescence
- Automate Replenishment

# Value Chain Transformation

## Best in Class Examples

- ✓ **30%** increase in operator productivity
- ✓ **100%** inventory accuracy
- ✓ **30%** decrease in handling cost / unit
- ✓ **95%** reduction in overtime used
- ✓ **30%** reduction in scrap
- ✓ **50%** increase in on time shipments

## BENEFITS

- Optimize** and **Streamline** fulfillment operations
- Synchronize** processes across functional silos
- Monitor** supply chain performance to **Goals**
- Collaborate** with trading partners for **Accurate** supply chain **Data**
- Globalization & Standardization** of processes
- Drive customer **compliance**
- Support** expansion into new markets and higher business volumes
- Greater **Agility** to respond to **Change**

# A Few More Customers...

## High Technology

## Consumer Goods / Distribution

## Healthcare & Life Sciences

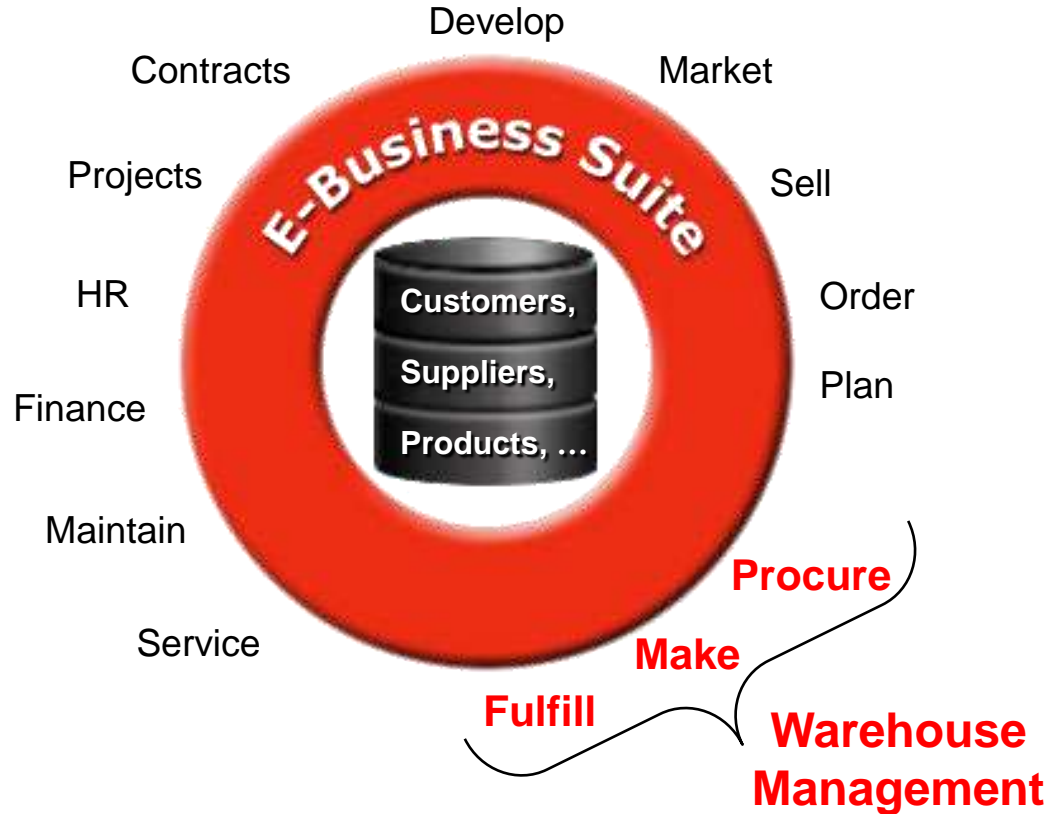

## Industrial Mfg

# Agenda

- Business Challenges
- Oracle's Leadership Position
- **Solution Overview**
- Customer Success

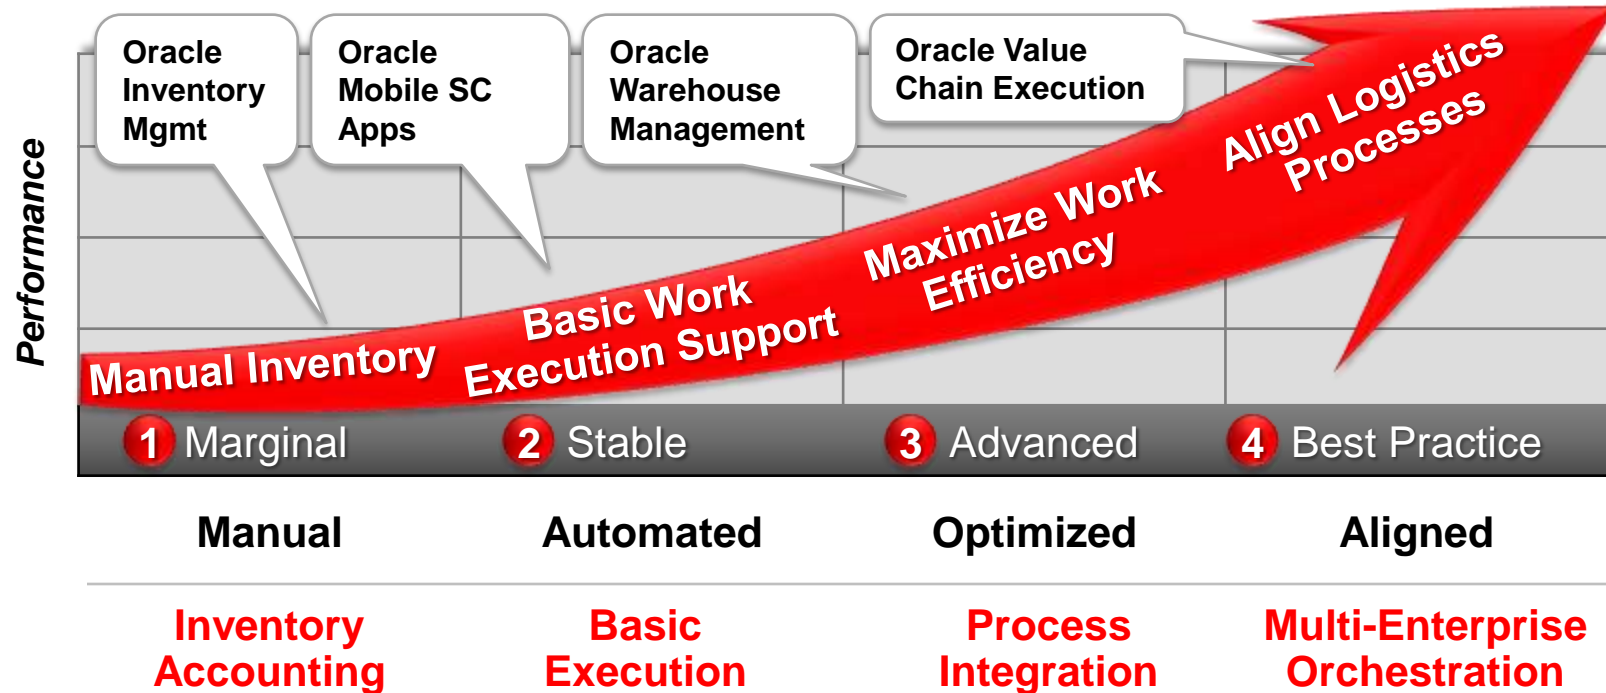

# Foundation: Unified Information Architecture

- Common data model enables a single source of truth
- Comprehensive suite of applications designed to work together
- Robust set of integration services based on open standards
- Modular deployment by business flow
- Single global instance implementations

# Value Chain Transformation

*From Fragmented Supply Chain to Integrated Value Chain*

# Oracle Mobile Supply Chain Apps (MSCA)

*Support Basic Warehousing Needs...*

## **Built-in Mobile User Interface**

### **Mobile Manufacturing**

Moves, Issues, Returns,  
Scrap, Completions, ...

### **Mobile Quality**

Quality  
Collections, Specifications, ...

### **Mobile Receiving**

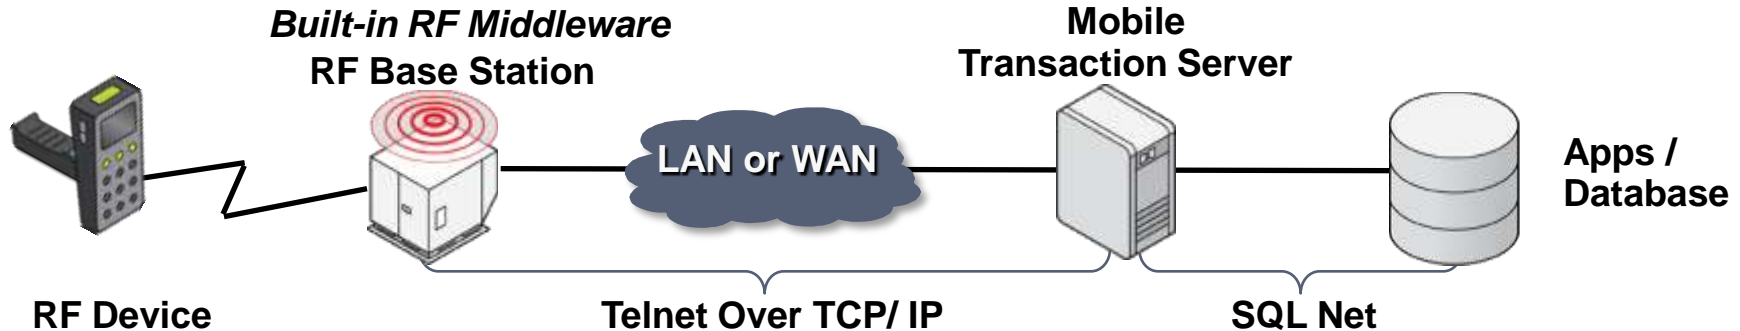

Direct, Std, Inspect, Cross-  
Dock, Print, ...

### **Mobile Inventory**

Misc.  
Transactions, Transfers, Counts,  
...

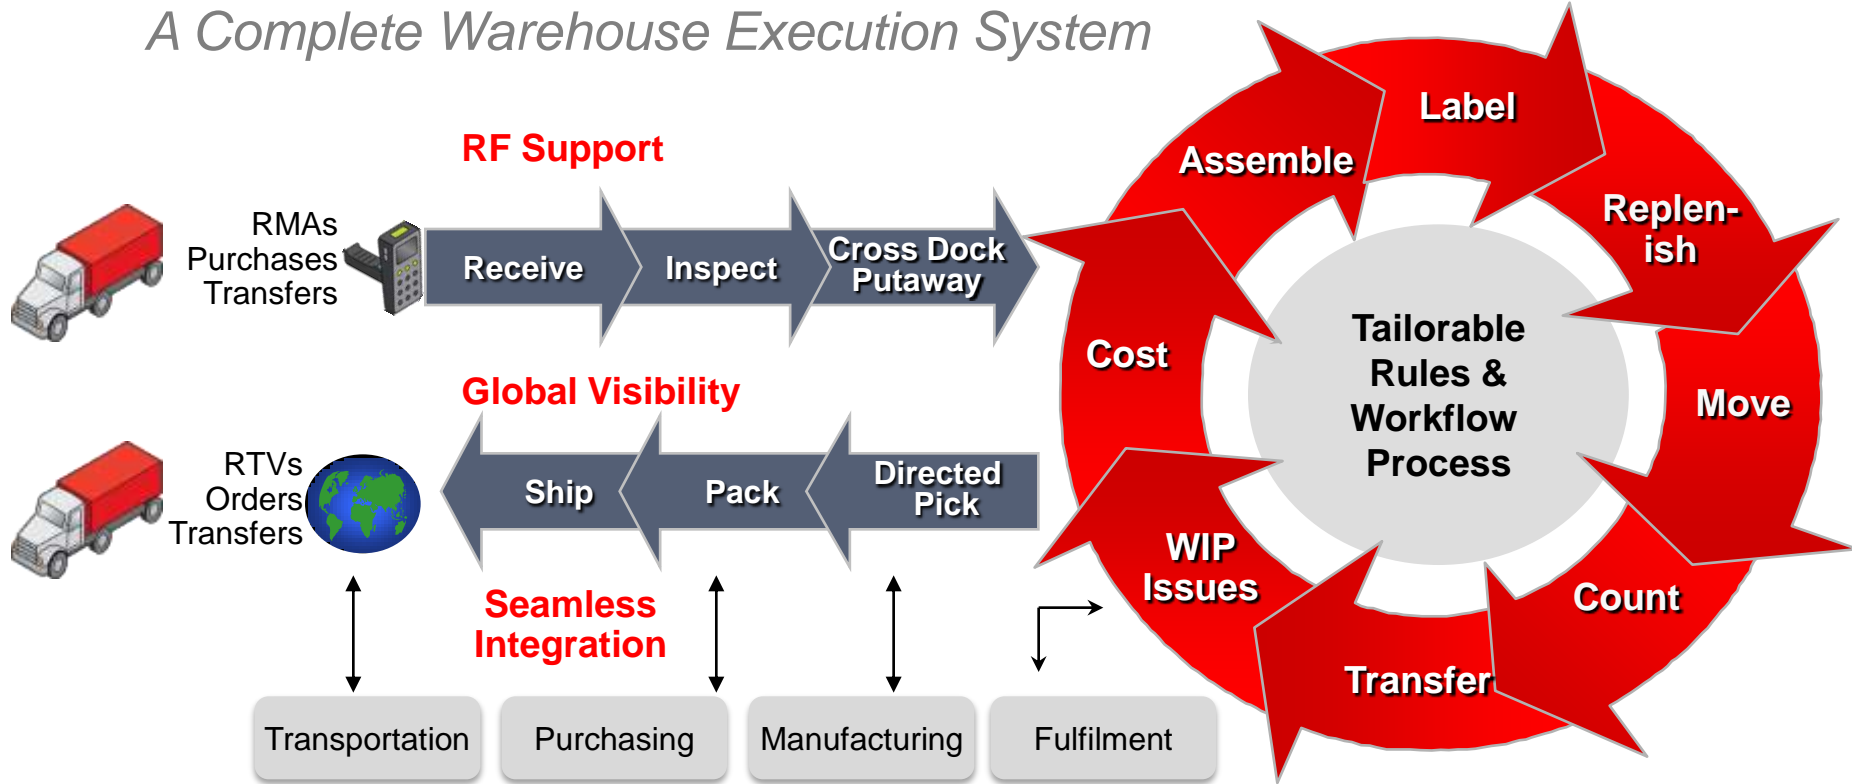

### **Mobile Shipping**

Pick, Confirm, Ship, Confirm, Print  
, ...

# Oracle Warehouse Management Solution

*A Complete Warehouse Execution System*

# Oracle Warehouse Management Solution

## ***Delivers...***

- 1 Responsive Fulfillment
- 2 Optimized Decisions
- 3 Aligned Processes

# Rule-Driven Processes

*Flexibility Meet Needs without Customization*

**Support for: Directed Picking, Directed Put-away,  
Tasks Assignment, Costing, Labeling**

- Eliminates customizations
  - Supports common tool with Eg.
  - Easily changed and evolved
- 
- Improves ROI and ongoing support
  - Accelerates implementation
  - Increases long-term flexibility

# Barcode and License Plate # Support

*Perform Complex Inventory Transactions*

## Multiple Packages and Products

### Barcode Support

- Automatically Track All Related Product Information
- Capture All Information with a Single Scan

**Worker Productivity**

## Single Unique Number for All Information

### Container and LPN\* Support

- Supports Infinite Nesting Levels
- Perform Complex Moves via a Single Scan
- Fully Integrated with ASNs

**Improves Efficiency, Accuracy, and Tracking**

\*License Plate Number

ORACLE

# Automated Compliance Labeling

*Meet Customer Specific Requirements*

- **Support Numerous Types and Variations of Labels**
  - LPN, LPN content, LPN summary, material, serial, location, shipping, shipping contents, WIP contents
  - Print & Scan industry standard product barcodes: UCC-128, EAN-8, EAN-13, UPC, EAN/UCC-14
- **Flexible to Meet Your Business Needs**
  - Design and rendering choices
  - Highly flexible configuration
  - Adapts to changing requirements
- **Data Transmitted via XML Directly to Printer or via Middleware of Choice**
- **Out of the Box Support for Epcglobal Compliance Mandates Including SGTIN-64 / SGTIN-96**

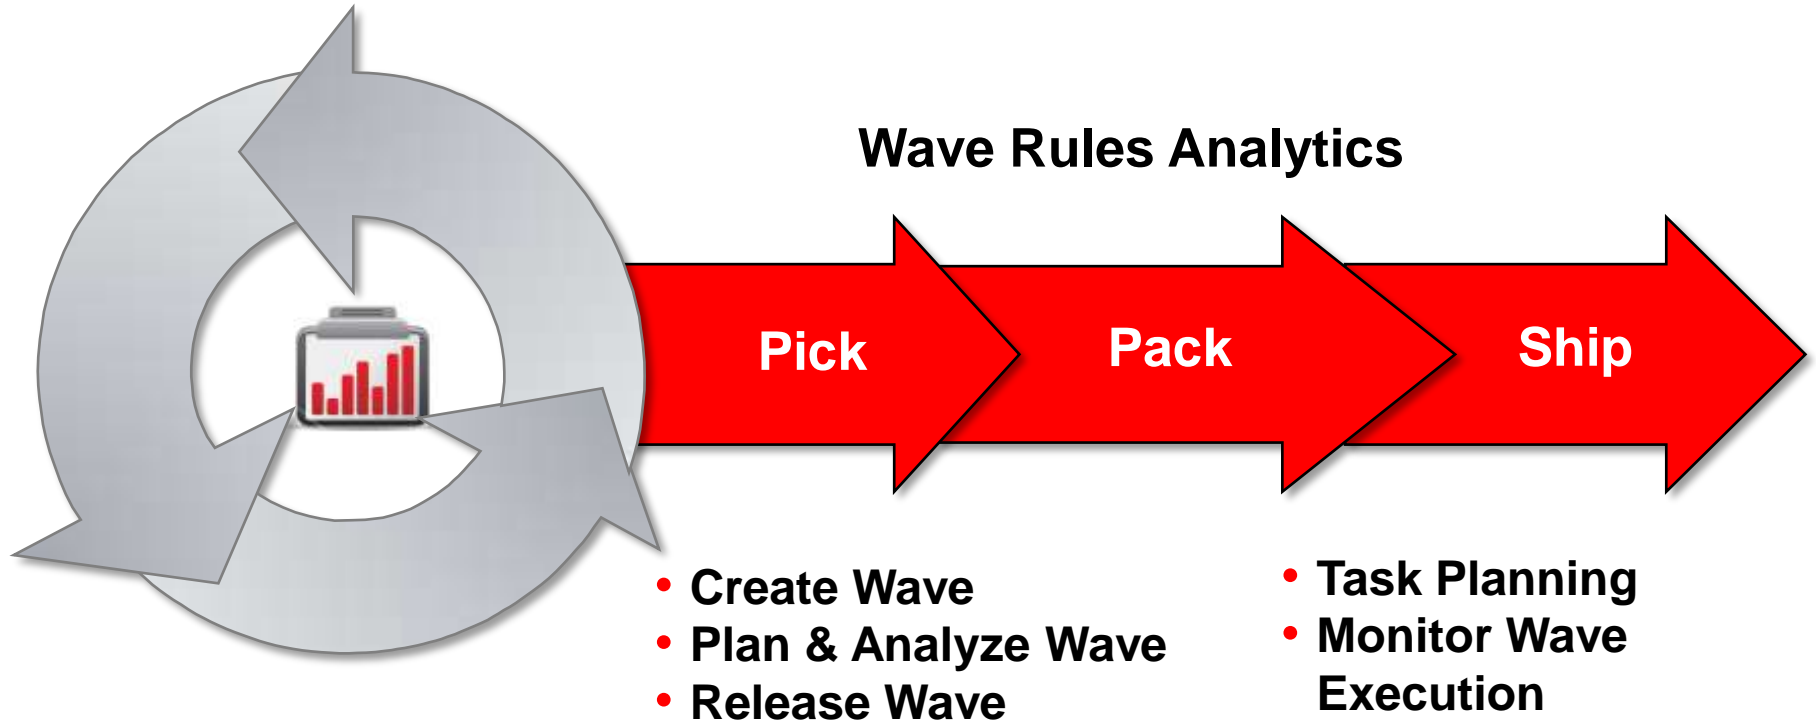

# Oracle Warehouse Management Solution

***Delivers...***

- ① Responsive Fulfillment
- ② Optimized Decisions
- ③ Aligned Processes

# Comprehensive Wave Planning

*Advanced Tools to Manage Work on the Floor*

# Automated Task Management

*Create, Organize, Dispatch Tasks to Optimal Resource*

**Pick Wave**

Create &  
Allocate  
Task

Split  
Merge  
Sort

**Task Queue**

- Dispatch Tasks To RF Devices
- Support Multiple Picking Methodologies
- Match Skills and Equipment to Tasks
- Perform Task Sequencing and Interleaving

- Create Paperless, Streamlined Processes
- Align Pick Plan with Business Mix
- Reduce Safety Issues and Training Costs
- Significantly Reduce Travel Time

## Proactively Manage Warehouse Performance

-

# Labor Management and Reporting

*Optimize the Utilization of Limited Resources*

## Task Performance Reporting

- View Historical Task Completion Times
- Capture Task Time Trends
- Track Allocation of Employee Work Time

## Labor Productivity Management

- Define Standard Resource Information
- Summarize Resource Requirements and Outstanding Work
- Evaluate Productivity of an Individual or the Entire Warehouse

**ORACLE® Labor Management System**  
W1 - Kansas City Distribution

SUMMARY ANALYSIS WORKBENCH

**Labor Management Summary**  
\* Indicates required field  
Time = Seconds

**Resource Requirement**

Activity	Available Resource	Available Time	Time Required	Time Overload Factor (%)	Additional Time Required
Inbound	5	122400	208254	70.14	85854
Outbound	8	195840	47505	-75.74	-148335

**Variable Resources**

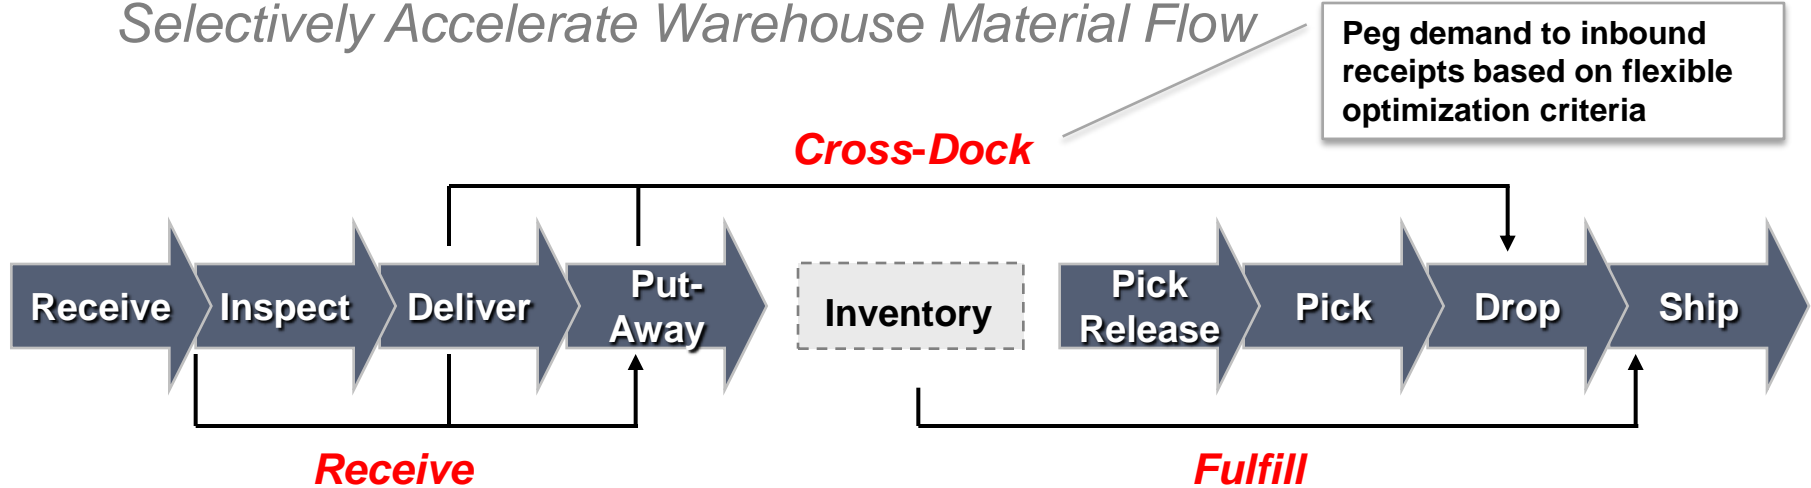

Activity	Available Time	Available Resource	Resource Demanded	Resource Overload Factor (%)	Additional Resources Demanded
Inbound	122400	5			51
Outbound	195840	8			06

**Warehouse Productivity - March, 2006**

User	Overall Rating	Total Travel Score Rating	Travel Transaction Score Rating	Transaction Unit Score Rating	Work Unit Idle Score Rating	Idle Score
W1 - Kansas City Distribution	Excellent	8340 Excellent	4790 Excellent	3550 Excellent	8340	

# Cross-Dock and Direct Ship

*Selectively Accelerate Warehouse Material Flow*

- Configurable Flows
- Robust Consolidation Methods
- Planned & Opportunistic Cross-Docking
- Rules Based Supply – Demand Matching

- Adjust To Storage Policy Changes
- Accelerate Receiving & Fulfillment Processes
- Reduce Handling And Inventory
- Increase Operator Efficiency

# Directed Picking and Put Away

*Automatically Suggest Optimal Locators*

- Slot Dynamically Based on Velocity, Size, Etc.
- Control Hazardous Materials / Co-mingling
- Handle Task Exceptions with Reason Codes

- Optimize the Use of Storage Locations with Dynamic Slotting
- Minimize Inventory Fragmentation
- Reduce Chance of Obsolescence

# Advanced Inventory Capabilities

*Provide Single Source of Truth for All Inventory*

- **Maintain Accurate, Real-Time Information**
  - Physical inventory measurement
  - Holding and other associated costs
  - Cycle counting
- **Manage Inventory Levels**
  - Automated replenishment
  - Kanban management
  - Transfers between facilities
- **Support Advanced Tracking Capabilities**
  - Material status control
  - Inventory ownership tracking
  - Advanced lot and serial control

# Oracle Warehouse Management Solution

## ***Delivers...***

- ① Responsive Fulfillment
- ② Optimized Decisions
- ③ **Aligned Processes**

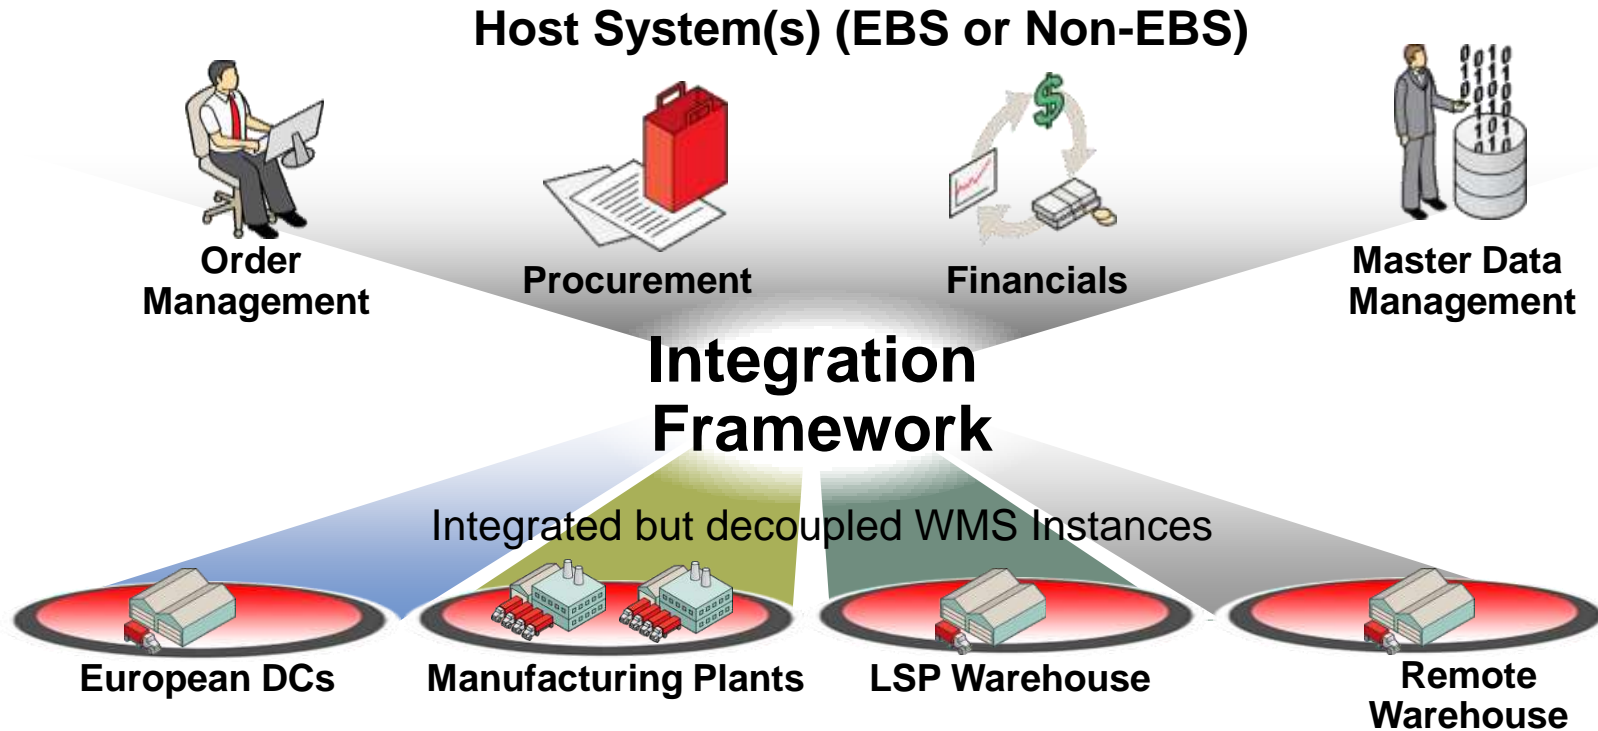

# Comprehensive Logistics Solution

*Integrated Logistics Adapts to Changes*

# Distributed Deployment Options

*Disconnected and Integrated*

# WMS and Discrete Manufacturing

*Extends Beyond Sales Order Inputs*

- **Solution Integration Enables:**
  - Task-managed component picks
  - Cross-dock to / from manufacturing
  - Directed ship from manufacturing
  - Compliance labeling
  - LPN and lot / serial creation and tracking
- **Supports Full Spectrum of Tasks:**
  - Simple kitting to full BOM / work order jobs
  - Seamless CTO flow

# WMS and Service / Spares

*Integrate All Inventory Transactions*

## Warehouse Mgmt

## Service / Spares Mgmt

**Manage High Volume DC Operations (Pick, Pack And Ship) with WMS and Leverage Internal Orders to Release Parts to the Field**

- Provide a Single, Common View of All Inventory
- Integrate and Manage Internal and Field Inventory Locations
- Consolidate / Coordinate All Field Requests to Maximize DC Efficiency

# Summary

- ✓ Supports Value Chain **Transformation**: flexible, optimized and aligned processes for fulfillment excellence
- ✓ **Global**, anywhere-to-anywhere fulfillment support across lines of business, supply chain flows and regions
- ✓ **Best-in-class** modular solution enables incremental deployment

# Agenda

- Business Challenges
- Oracle's Leadership Position
- Solution Overview
- **Customer Success**

# Beckman Coulter

## WHO

- Leading manufacturer of biomedical testing instrument systems, tests and supplies

## CHALLENGES / OPPORTUNITIES

- Needed to reduce shipping costs and improve on time delivery
- Manage compliance in the regulated industry with hazmat and cold chain requirements
- Minimize shipment errors and waste

## SOLUTIONS

- Oracle Warehouse Management
- Oracle Transportation Management

“With Oracle Transportation Management and Oracle Warehouse Management as the foundation for our distribution operations, customers should be satisfied because we deliver the right products on time and can answer their questions; our users are happy because the system has improved processes; and the company is pleased because we provide better service, better quality and are saving money. It is a huge win.”  
*Carl Sandvik, Director, Business Process, Beckman Coulter*

## RESULTS

- 40% increase in lot shipment accuracy
- 25% reduction in warehouse staff required
- Increased on time shipment performance from 89% to over 99%

## COMPANY OVERVIEW

- Regional furniture retailer operating 25+ showrooms/stores in the greater Chicago and Northern Indiana areas
- 95% of sales are shipped from DC for home delivery

## CHALLENGES / OPPORTUNITIES

- Move from existing outgrown GERS platform lacking flexibility
- Handle drastic volume swings as the housing market hit a downturn

## SOLUTION

- Live on EBS 12.1 including Warehouse Management; implemented by Deloitte. Not yet live on Order Mgmt.
- Motorola MC9090 and VG5090 RF units
- Zebra barcode printers

## OPERATING ENVIRONMENT

- One (1) DC of 300K sq. ft. in Lombard, IL
- 80% of inbounds are overseas containers
- Outbound from DC is direct delivery to homes on 28 ft. trucks routed using UPS Roadnet
- Using WMS cross docking for bedding to good effect

## RESULTS

- Overall direct labor improvement of 14%
- Eliminated six (6) shipment auditors since pick accuracy is high due to positive confirmation using RF with barcode scan
- Have also seen savings in pick and put due to reduced travel time
- Much better visibility to info including supplier ASNs allows use of crossdocking for efficient handling of bedding

## COMPANY OVERVIEW

- Global manufacturer of insulated food and beverage containers, soft coolers, and lunch kits
- Approximately 2,800 global employees

## CHALLENGES / OPPORTUNITIES

- Increasing requirements from large retailers (e.g., RFID)
- Heavily customized applications build on aging computer platforms
- Reliance upon outside developers to write and maintain custom application interfaces

## SOLUTION

- Live on EBS 11i/On Demand
- Warehouse Management
- Order Management
- Financials

## CUSTOMER PERSPECTIVE

“With more demanding on-time requirements, inventory accuracy is essential. With Oracle Warehouse Management we know exactly what product we have, and where, at any point in time and the accuracy level is so high that our auditors no longer require us to take a physical inventory.”

-- Mike Yeager, Director of Logistics

## RESULTS

- Increased warehouse productivity by 30%
- Achieved 222% ROI and on track to realize benefits of \$6.2M
- Monthly book closing cycle improved 67%
- Higher staff productivity
- Lower inventory carrying costs
- Reduced IT management expenses

## COMPANY OVERVIEW

- \$419M leader in high-performance enterprise Storage Area Network systems
- 1,020 employees across the U.S., Europe and Asia
- Manufactures and markets high-performance switching equipment and heterogeneous network mgmt software

## CHALLENGES / OPPORTUNITIES

- Upgrading existing systems was cost prohibitive when compared with implementing EBS
- Complex, configured product & solutions

## SOLUTION

- |                   |                     |
|-------------------|---------------------|
| • Live on EBS 11i | • Discrete Mfg      |
| • Warehouse Mgmt  | • Service Contracts |
| • Configurator    | • TeleService       |
| • Order Mgmt      | • Depot Repair      |
| • Purchasing      | • Financials        |

## CUSTOMER PERSPECTIVE

"McDATA's challenge of growing business operations in Europe, Asia, and the United States can only be met with a flexible open system like Oracle EBS. Buying disparate "best-of-breed" applications requires costly and time-consuming integration services."

-- Don Wenninger, CIO

## RESULTS

- Replaced SAP with Oracle
- On-time shipments increased from 79% to more than 97%
- Reduced total inventory 75%
- Reduced days sales outstanding from 80 to 50
- Support complex configure-to-order fulfillment process
- Projects a five-year cumulative ROI of 352% on Oracle E-Business Suite implementation

## COMPANY OVERVIEW

- European leader in mission critical digital systems
- Designs & manufacturers digital systems and super computers
- Based in France with annual revenue of 1.25 billion Euro

## CHALLENGES / OPPORTUNITIES

- Complex configure to order manufacturing process with outside processing and high SKU counts
- Process synchronization across manufacturing, procurement & logistics

## SOLUTION

- Replaced Baan (ERP & Manufacturing) & Geode (WMS) with Oracle EBS
- Live on EBS including Warehouse Management
- Largely self implemented (leveraged only 3 external consultants)

## IMPLEMENTATION

- Live in 18 months on production, procurement, order fulfillment & planning
- Leveraged global planning combining all logistics & manufacturing flows
- Real time data entry with RF handheld scanners and WiFi printers

## RESULTS

- Online, error free financial reporting
- Reduced data entry errors from 5% to 0.1%
- Mobile enabled warehouse operators
- Average savings of 1-2 days in the order to purchase process

## COMPANY OVERVIEW

- A leading provider of next-generation mobile communication solutions organized into two business units:
  - Mobility (handsets, mobile voice/data)
  - Solutions (radios, infrastructure, barcoding).
- Global Fortune 500 company based in Illinois

## CHALLENGES / OPPORTUNITIES

- Currently running four (4) regional ERP instances including various versions of EBS 11i and one SAP instance.
- Worldwide user base with 24x7 operation.
- Desired end state of one (1) global R12 EBS instance with regional WMS instances.

## SOLUTION

- Deploy Distributed WMS (R12.1) interfaced to disparate ERP instances using Informatica
- Initial install at Schaumburg, IL warehouse (75Kft2, 70 users)
- Implementation done in-house by Motorola IT

## RESULTS

- Decoupled WMS and ERP for high availability and round-the-clock operation
- Rapid implementation in five (5) months – kick-off January 2010, live June 2010
- Ability to leverage the latest WMS features without upgrading the various ERP instances
- Using WMS for both warehousing and supply of components to manufacturing
